Subject: HANJ Follow-Up

Steve,

I did want to mention a few things from our conversation with Elena and her staff yesterday. What I heard is that if they are unable to re-instate the HHS funding supplemented by their fundraising events, it is likely that the New Jersey HTC's will join the NY Consortium. According to Elena, the Regional Director is putting enormous pressure on the NJ MD's as well as on the remaining NY non-340B HTC's. Also, I'm not sure if you heard the discussion regarding a manufacturer that is giving further discounts to the NY Consortium in addition to the already low 340B purchase price. This puts us at an even greater disadvantage in the pricing arena.

My suggestion is to propose offering Elena a consultant or educational role with HHS which may allow the company to support the requested donation to HANJ. Possibly, Elena could provide education to non-340B chapters/HTC's regarding a program like HSI which prevents the need for 340B.

In the current climate where HANJ has articulated that they feel their request has been ignored, I recommend we respond to Elena ASAP and no later than 7/27/10 prior to their board meeting where she will report the results of her communication with HHS.

Craig,

This is good news regarding our 2010 status. Martha spoke directly with this patient and unfortunately she is without a computer this week. I know Elena has been very stressed recently to the significant losses this year resulting in increased demands on her. Martha did convey to me that Elena did have this conversation with the patient. To ensure accuracy though, you may want to clarify further with Martha (201) 637- 4711.

Amy,

Thanks for the update. HHS will continue to be HSI's largest funding company of this program in 2010. Please confirm for me if possible if Elena spoke to the patient and what she said. I do not think she would do this, but if confirmed I will need to address it. We have never said we would pull away from this program. We have been a provider from the beginning and plan to continue to be an HSI provider going forward.

Thanks,
Craig

Craig,

Thank you for the information. It is my understanding that Elena spoke directly with the patient and she told him that as of 2010 HHS would no longer be participating in their H.S.I program. The patient told Martha that he would not unitize a company that does not support HANJ and that he had already contacted and switched to BioScripts. It would be helpful for to me to know if the funding for 2010 was discussed as well as the status of our continued participation with program. This patient is with RWJ which is the largest referral source in NJ and I'm anticipating questions from them regarding his choice.

I spoke again with Martha regarding Pat Johnson and neither of us are aware of her job status. Martha did indicate that Pat did not have any relationship with this particular patient.

Folks,

I spoke to Elena and updated her on our funding for the rest of 2009. I also shared with her that one of our patients communicated to us that they would be leaving to go to BioScripts. The patient communicated to Martha that he had received a letter from Elena that HHS would no longer be a provider for HIS next year. Elena immediately said that no such letter was sent and went on to say we are their number one company and have been so since the beginning of this program. I told her that I assumed that there was not a letter but that something else was going on. She asked for the patient's name and I told her I did not have the patient name but that it was one of Martha's patients.

Team-please let me know where Pat Johnson is working now? Is she working for BioScripts?

Thanks,
Craig

Subject: HANJ

Good morning everyone!

This email is to summarize a conversation I had with Elena Bostick yesterday. Elena let me know that she was upset about the cuts HHS was making to the H.S.I. contribution. Elena also said she is still waiting for confirmation of the information and additional funding that you mentioned to Rick Vogel, Craig.

Craig and I spoke briefly about this situation last night. Craig indicated that he would give Elena a call today to discuss. I followed up with Elena this morning and let her know to expect the call.

Also, Martha had a patient that mentioned receiving a letter from HANJ that stated that as of Jan 1, HHS would no longer be participating in the H.S.I. program. This client left service for BioScrip as a result. I contacted a Board member that I have a good relationship with to confirm this mailing. The board member indicated that she never received such a letter. Jim Cline stated that none of his patients had reported receiving a letter either. To date we have been unable to confirm that any such mailing went out. Martha is going to continue working with the patient in question to see if a copy of this letter is available.

Craig has asked us to confirm about how many patients that we have on our case loads that are receiving insurance assistance through H.S.I.

Thank you.

**ACCREDITO MEETING WITH
HEMOPHILIA SERVICES, INC.**

Wednesday, July 14, 2010

PRESENT: Amy MacBeth and Steven Greenfield – both of Accredo. Elena Bostick, Rita Matagrano and Genevieve Christo all from HANJ.

Elena explained our great concerns about the \$100,000 cut from HHS to HSI. She also stated that we have 77 insurance grant recipients, of which 59 are HHS clients.

Treatment Center requests for grant money has increased to over \$550,000.

Elena showed Steven and Amy the letter she sent to Craig requesting they not cut our funding and the many reasons why.

Also discussed was the "Quality/Satisfaction Survey" sent to our members and the disturbing response from two of HHS clients. An e-mail was sent to Mary Jane and Craig Mears two months ago with no answer as of today. Steven and Amy were going to check into this.

Another incident was brought to their attention: one of their clients moved to Florida – he was on our insurance grant program – and we were not notified. Blue Cross/Blue Shield Fraud Department caught this error and they notified us. We were paying his policy for 6 months longer than he was eligible for. We told them we did not want this mistake repeated again.

They were going to also look into this.

In conclusion, Steve said he was going to talk to Craig as soon as possible and hoped to have some positive answers before our Board meeting on July 27th.

Meeting adjourned 2:30 pm.

To: Karen Griffin (HHS)
Subject: RE: HSI/HANJ

Karen,

I have made it absolutely clear that there is no additional funding available.

Amy and I spoke again on this yesterday and I reiterated the message. She kept asking why and whether there was a chance for some possibility of increased future funding. I explained, in detail, the current circumstances regarding Accredo and HHS behind plan and even instituting travel restrictions to save money. I also told her that I understood her desire to have some positive positioning on this subject but that I did not see funding increasing. Amy referenced Craig and felt that HANJ held him responsible. I told her that I didn't believe Craig even had the latitude to increase funding. She mentioned that she had e-mailed you and Craig and asked if I had spoken to you. My impression was that she felt she wanted to make a last appeal, to Craig. I told her that everyone was extremely busy.....but that Craig maintained an open door to all employees.(I can certainly adjust to a more qualifying chain of command, if you believe the "open door" policy is being abused....I look forward to your guidance here.)

Personally, I have spoken to everyone involved, from Craig to Elena, the local team of course you. I think all of us at HHS, involved with HANJ, want sincerely to help and see their organization succeed. We provide a tremendous amount of funding, hundreds of man hours and unflagging support from our senior management. Your constant support along with Craig's personal contribution, at the HANJ walk, was outstanding and hugely appreciated. Please know that I understand and support the business decision on funding HANJ.

(I'm in PR traveling home most of today. I'll give you a brief in a separate e-mail.)

Best Regards,

Steve Greenfield

RE: POSSIBLE "PHASEOUT"
OF INSURANCE
PROGRAM

Dear Member,

As you are aware insurance costs continue to rise in the State of New Jersey. Over the past ten years a successful partnership between Hemophilia Services, Inc. (HSI), the State of New Jersey and the "authorized" home care providers, who participate in the HSI program, has been able to "subsidize" the cost of insurance Policies for our "uninsured" patient population.

Unfortunately, due to insufficient funding for this groundbreaking program, the ability for HSI to continue to support this program is now in jeopardy for the balance of 2011. One of our key providers (HHS/Accredo) has continued to significantly reduce its financial support for this program over the last two years. In the recent past, HSI, in cooperation with the Hemophilia Association of New Jersey (HANJ), and with a restructuring of the "patient criteria" for obtaining Insurance Policies, was able to absorb the additional cost no longer funded by HHS/Accredo. It should be noted that the cost to purchase Insurance Policies for our patient population in 2010, alone, approached one million dollars.

However, I am writing at this time to advise you that, beginning January 2011, HHS/Accredo has chosen to reduce its financial support so significantly, that as a major participant, this reduction has placed the Insurance Program in jeopardy of being phased out, and ceasing to exist in the foreseeable future.

If you are a client of HHS/Accredo or a participant in HSI's Insurance Program, on behalf of the HSI Board, I request that you IMMEDIATELY contact Craig Mears, President of HHS/Accredo,

HSI

at the following address:

Craig Mears, President
Accredo's Hemophilia Health Services,
201 Great Circle Road,
Nashville, TN 37228

OR call

615-850-5079 - his office phone

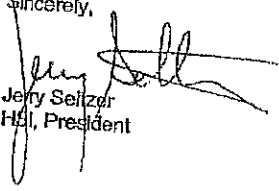

OR

615-320-3114 - his blackberry.

It should be noted that if we do not receive a commitment from HHS/Accredo to restore financial support for the coming year (2011), "sadly" we will have to notify the State of NJ that the very successful Insurance Program for our uninsured patient population is in danger of being "phased out" due to lack of funds.

Please contact our HSI Program Coordinator, Rita Matagrano, for additional information and/or concerns regarding this matter. Remember, the continued success of the HSI Program depends upon your ongoing support and participation.

Sincerely,

Jerry Seitzer
HSI, President

JS/m

Attn: Craig Mears, President
Accredo's Hemophilia Health Services
201 Great Circle Road
Nashville, TN 37228

Good day:

It is with great dismay that I find the need to write this letter. I am in receipt of a letter from Jerry Seltzer, HIS President, informing me that your firm has not issued a commitment to HHS/Accredo this year to support the insurance program at HANJ.

As a member of HANJ and and a consumer that uses your firm it displeases me to hear this. I wish you would reconsider this decision. As a recipient of the aid that program provides, it further causes me concern for the future.

Thank you

To: 'elizabeth.lacorte@accrediohealth.com'; 'Robert.Kaufer@AccredoHealth.com'

Subject: HHS/Accredo's lack of support for HSI

It was very disturbing to receive a letter from Jerry Seltzer regarding HHS/Accredo's lack of support for HSI's insurance program. Jerry Seltzer suggested that I call your president, Craig Mears, to urge that HHS/Accredo resume its support of HSI. Unless absolutely necessary, it is not my style to make unwanted telephone calls to people; hence this letter. Please make sure that Mr. Mears receives this letter and personally acknowledges receipt of my letter. A letter of explanation would be appreciated but resumption, or better yet an increase, of your support would be even more appreciated.

I was President of the Hemophilia Association of New Jersey (HANJ) long ago and have always been an active supporter of their programs. In the 1970s and 1980s, during which period I was President and Chairman of both HANJ and NHF for periods of time, I was very much involved in obtaining state support for home care, obtaining open enrollment for BC/BS including coverage for pre-existing conditions, obtaining mandatory insurance coverage for new generation products, guaranteeing insurance coverage for home care use of clotting factor, and supporting state support for subsidization of insurance coverage among many other initiatives. In 1989 I appeared before the FDA's Blood Products Advisory Committee and successfully urged its approval of recombinant product which I now use. From 1989 to 1993 I was appointed by Congress to the National AIDS Commission and was instrumental in providing further federal support for hemophilia treat centers, among other accomplishments. From 1992 to 2009 I was required to terminate my involvement in the HANJ and NHF because I was serving as a Superior Court Judge in New Jersey after my appointment by the Governor and confirmation by the Senate. I retired in 2009. Last year (2010) I purchased 197,500 i.u. of clotting factor from HHS/Accredo.

In New Jersey we have prided ourselves on the cooperative working relationship between within the entire hemophilia community which includes patients, treatments centers and their staffs, the pharmaceutical industry, the State of New Jersey and home care companies like HHS/Accredo. That close working relationship has inured to the benefit of the entire community. As support for comprehensive care leads to improved care, resulting in more efficient home care use but less hospital based or emergency room care, enhanced insurance coverage again results in increased access to home care and decreased reliance on in-hospital or emergency room care. This improved and more cost-efficient care also ends up helping home care companies like yours. I cannot understand why you would diminish your support for a program that, in the end, helps HHS/Accredo provide its services more efficiently.

When it was time for me to choose a home care company I chose HRA because, in part, it was an active supporter of the HANJ, HSI and their programs. HRA was eventually acquired by your company. Even though I have Medicare and do not need HSI's support, I certainly want my home care company to demonstrate their support for the hemophilia community, particularly for those who are without insurance.

Martha's patients are blue
Mine are grey
The ones Martha and I are covering for Elizabeth are in yellow.

Total patients = 37 that is if I am still seeing straight (these screens are so small!)... not all receiving assistance, but are either getting assistance or are board members.

I also believe that there are a bunch of low-using patients that receive assistance from HANJ... but the patients are just not assigned to our caseloads. Martha, Jim and I could probably pick them (or at least most of them) off an unassigned patient list, if you want and can get us a copy of that report.

Thanks!

Cc: Steven Greenfield
Subject: RE: HSI NJ Business ROI

Good afternoon Craig, below is the information that you requested.

Orange = Adam's Comments

Blue = Steve's Comments

- **Is there quantifiable ROI we can point to if we move from \$175k to \$350K?**
- Prevent potential loss of 51,538,880 units currently dispensed to patients utilizing NJ HTC's. This number seems high if the only risk is for patients utilizing NJ HTC's. I show that for the last 12 months, patients that have NJ HTC's have utilized approximately 43 million units with gross margin of \$9.2 million. If all NJ patients are considered at Risk, this number is significantly higher (see below).
- We have seen since 2008 a 10% increase in units (4MM) per year. The ROI would include a stabilization of this number.
- **What is likely business deterioration to NJ market share if we don't increase**
- NJ HTC's will resort to developing 340B programs placing all new and existing business at risk. For any patient that switches to a 340B program, we will lose 100% of the margin associated with that patient unless we are able to service the 340B program, in which case we will lose approximately 50% to 60% of the margin depending on the contracted 340B rates and assuming consistent usage.
- Currently 57 plus (new patients added in 2011) HHS patients utilize the Hsi insurance program. Of those patients, most are very high volume prophylaxis patients who are at risk of losing insurance or moving to another provider. The NJ HTC patients all seem to be big users.
- New and existing business erosion with the addition of two new Hsi providers (BDRN and Coram) in 2011.
- **What is size of overall fund and what % does Medco contribute?**
Per our discussion – Hsi receives approximately 2 million dollars per year to fund their program. Medco percentage based on previous and current contributions would be about 17%.
- **What % of NJ market share do we currently have?**
HHS services the majority of the patients in the NJ market with the exception of the Aetna and Cigna lives. State of NJ approved HSI providers include Bioscripts, HHS, Bleeding Disorders Resource Network and Coram. Bioscripts has approx 40 patients primarily because they are the Aetna provider in NJ. BDRN has a handful. We have at least 95% of Horizon BCBS NJ patients. Horizon is the largest payor in the state with 3 million lives. HHS is one of two providers for HNJ Health 450,000 lives which is the managed Medicaid arm of Horizon BCBS NJ.

As of the end of Q1 2011, HHS has 401 active patients with a patient state of NJ. The estimated total Hemophilia population for the state of NJ based on 2010 census data is 646 patients.

Assuming one hemophilia patient per 13,600 residents, then HHS has a total market share of 62% (401/646).

What is overall profitability of NJ Hemophilia market?

Per December 2010 dashboard:

Net Revenue \$59,034,165.10

Total GM \$10,181,227.58

Total GM% 17.25%

Based on the last 12 months with a patient state of NJ:

Net Revenue \$77,114,302.29

Total GM: \$15,649,757.08

Subject: HSI NJ Business ROI

Steve and Adam,

Need your input ASAP.

- Is there quantifiable ROI we can point to if we move from \$175k to \$350K?
- What is likely business deterioration to NJ market share if we don't increase? Steve, for these first two questions, do you have enough insight to quantify what percentage or a number of patients we may lose because of decreases in charitable donations?
- What is size of overall fund and what % does Medco contribute? Steve, do you know this?
- What % of NJ market share do we currently have? I can probably estimate this based on some assumptions used by Matt Killebrew to estimate market size
- What is overall profitability of NJ Hemophilia market? I can provide this by mid to late afternoon tomorrow. Will that work within the timeline?

1. Please show YOY trend

Please let me know if you have any questions. Can you get me these answers by tomorrow afternoon?

Thanks,
Craig

Subject: RE: HANJ Funding HSI Funding

Amy,

I am trying to get a commitment on the additional funding. I have recommended another \$175,000 be donated to HSI. I have buy-in from Frank and Bruce. Bruce has spoken to Pete Stark and next he will be speaking with Steve F. I have supported the return on our investment but I do not know yet where the funds will come from. Mostly they will come out of our operating budget.

I would like to be able to give HSI an update before the 19th and will do everything I can to make it happen. I would love to get everything approved so I could be there with another check.

Thanks,
Craig

Subject: RE: HANJ Funding HSI Funding

Craig,

Is there any update on the investigation of additional funding for HANJ? Their annual meeting is scheduled for 5/19 where Elena will deliver the status of the organization to the membership. If there is potential for further support would it be possible to notify HANJ prior to their meeting so this news could be announced to the membership during this meeting? This event is very well attended and the message would reach the majority of the consumers/membership.

Thank you.

Subject: FW: HSI Funding Request
Attachments: NJ Charitables 2011-2012 FY Funding HSI Summary.xlsx; 2010-HSI 990.pdf; 2010-HA of NJ 990.pdf
Importance: High
Sensitivity: Confidential

Folks,

My update on HSI Funding:

Accredo donated \$359,165.00 to HSI for their Fiscal Year ending June 30th 2011. This includes the \$175,000 we donated in February 2011.

I have Bruce's commitment that we will allocate \$350,000 to HSI for next calendar year. So, what I have communicated to HSI through Mark Scudiery is that Accredo would donate \$350,000 in February of 2012 which is still within their next FY budget that starts July 1, 2011 and ends June 30th 2012. This would keep us whole at \$350,000 year over year.

I also will be scheduling a meeting with Mark, Elena and maybe a few other members of the board for Bruce and I to meet with them in the next couple of weeks.

Let me know if you have any questions. I have also attached HANJ and HSI's 990 reports for your information. Good luck at the meeting.

Thanks,

Craig

Importance: High

Bruce,

HANJ Donations: Annual Meeting, Patient Education Events, Fundraisers

2010-\$55,000

2009-\$28,000

2008-\$12,475

Bruce-can I get a written commitment for \$350,000 HSI Funding for February 2012?

HSI is on a FY ending June 30th 2011. For the FY 2011 we have donated \$359,165.00 to HSI. If I can guarantee them \$350,000 for FY 2012 and make the donation in February 2012 of \$350,000 then we will keep our funding for these two fiscal years.

Thanks,

Craig

4

HANJ meeting:

December 19, 2011

Attendees:

Bruce Scott Pres., Diana Florio VP, Kirk Cothum VP,

Craig Mears VP, Steve Greenfield AVP, Amy Macbeth AM

Craig: Let me start with a summary on what has happened so far. Last year our contribution was cut in half from 500,000 to HSI. We communicated the change and they told their patients. We then saw a decline in business. At that point I worked with Bruce to see about increasing their funding. We committed to increase their funding by another \$175,000 starting in January to \$350,000. They were more approaching this from a business standpoint. They said they had 72 patients and 58 patients were Accredo's. They said they wanted more to fund our patients. Over the years Gentiva was acquired by Accredo as was HRS PSA and CCS. They all provided funding, which has decreased. They think the funding should stay the same and are mad that we aren't paying...

Bruce: How has this affected our business? Have our margins decreased and if we increase back up to 350 will they stop throwing us under the bus?

Kirk: Also what is the profile of the patient?

Craig: HANJ provides insurance for patients similar to PSI for Virginia only PSI does a yearly review.

Bruce: How does this compare to others?

Craig: PSI at a Virginia has a two-year max and HPPS out of Philadelphia. They get a lot of manufacturer funding and use that to support the HTC's.

Amy: They're very upset with us... they see the funding being cut and want an amount that will pay for our patients. Bio script stepped up and provided some funding.

Bruce: Do we know the size of contributions from Other Donors?

Amy: No

Craig: We have some intelligence on that I'll have to see if I can find. They have \$4 million in the bank and use that to support their HTC's. Unfortunately they look at this based on a business transaction because of our 58 patients and they want an equivalent amount to be paid. I spoke with Elena about increasing costs.

Diana: Is Mark Scuderi involved?

Craig: Last year he was very much involved and he relayed much of this information to Elena and the board. Carl Percy has taken over the board. He has more dislike for us than probably anyone. I sent in the budget and Rich said were not increasing but reducing by 200,000.

Bruce: What's in the plan?

Craig: \$175,000. It was supposed to be another hundred and 75,000 but somehow wasn't submitted. I think we need to circle back with the Medco foundation. Can we pull from the boys club of America?

Bruce: How bad are we being hit?

Amy: We've lost over 1 Million Units during the last year.

Bruce: Is Amy Johnson running profitability on that?

Craig: Margin is decreasing. I had Amy Johnson pull the numbers... we were down 1.6 million in profit margin year-over-year. We also gave NJ health some concessions.

Bruce: So this is a business decision?

Craig: Yes, you Frank and I were going in to speak with them. As far as going back in, the question is whether they've will accept that or continue to badmouth us and do everything to steer business to another provider. I think we need to get an answer. I hate to be blackmailed... it doesn't feel right.

Diana: Can we pay monthly? If we pay them in monthly amounts we can make sure they're not cutting our business. If they don't stop badmouthing us we can just cut them off.

Kirk: So If We Don't Do This they would continue to decrease our business?

Amy: They communicate with the HTC's and fund the HTC's so our business will decrease

Bruce: Well if they are bad mouthing us we won't fund them.

Kirk: I like Diana's idea of quarterly or monthly payments so that we can be sure our business doesn't decline.

Craig: What shall we do for next steps?

Bruce: I want to see financials. Kirk could you look at the budget?

Kirk: HHS has about 550,000 in total. The HIS line is 175,000.

Craig: We will also need to determine with Rich's Cut of 200,000.

Bruce: The answer must be driven to the business case, we must be careful.

Craig: I'll follow-up with Charles Johnson regarding the 2012 budget.

Bruce: Okay you'll get the info out when do we need to get back?

Diana: They are continuing to encourage HTC's to decrease referrals.

Amy: Yes they tell the community to switch.

Diana: We should set up another meeting for this group.

Bruce: So we are looking to restore to 350 and have a conversation.

Craig: I agree but don't know if they will agree.

Amy: So for now we will just hold off contacting them?

Craig: I'll get the information out to everybody and we'll set up another meeting.

5

HANJ meeting:

January 6, 2012

Attendees:

Bruce Scott President, Diana Florio Vice President, Kirk Cotham Vice President

Craig Mears Vice President, Steve Greenfield Area Vice President, Amy Macbeth Account Manager

Diana Florio: the point of this call is just to touch base again and see if we're any closer as far as decisions on the hand a funding

Craig: okay so I can give everyone an update... I had a meeting yesterday with Pete.... Finance , Charles and Diane Bailey and her group at the Medco foundation he did say we would find the additional 175,000 he would help us make that good... For HSI and so Bruce I guess were just going to need to confirm how are going to do that with Pete and you feel confident that you can move that money around so that we can make that commitment

Bruce: okay that brings us to 350?

Craig: yeah that brings us to 350 Medco foundation has the 175 and they want to pay the 175 out of their budget and then what we talked about was that Pete would pay the other hundred and 75 out of a credo. And so the next thing we want to talk about I think is how we want to pay this I agree with the thing that I think Diana brought up previously to pay monthly however that's not the easiest thing in the world process though I do agree with that strategy . I think Amy has an update on conversation that she had with Elena Bostic who is the executive director of HSI in regards to what if we did get our funding back up to 350 you know how would you treat us? I won't put words in your mouth Amy go ahead if you think that's appropriate

Amy: I just really wanted to see how we would be received with the 350, knowing that they're asking for 500,000 she said without making any promises or hard numbers... would be huge.... we would definitely be restored in good graces... they would send out communication... they would send out a letters letting... everyone knowso I think they'd be very happy with the 350,000.

Diana: Craig did we already give them 175 last year?

Craig: yes we did we gave them 175 in January of last year

Diana: so we need to give them another 175 now to make them whole for their fiscal 2011? Is that right?

Craig: well there fiscal started on July 1 so...

Diana: okay so we have to give them 350 for 2011.

Craig: the money has kept them whole you know during their fiscal year in the past but it has to be based off of our budget not theirs

Amy: Well, Elena is open to monthly or quarterly whatever works better for us

Diana: yet monthly may be tough to do quarterly may be easier. I don't know if we can do that with a check request to go through or

Craig: that's what we've done in the past Diana there's been a PO set up on this was set up through HHS finance in the past when we did monthly where they would send over an invoice and we would you know process that invoice and they paid off of an invoice

Bruce: hey guys I'm okay with this direction 350 and I'm encouraged by what Amy has had to report a thing going down this path to restore the 350 would be good... we have any idea what our competitors are donating?

Amy: I haven't been able to get any information. All I know is that bio script did step up when we cut our funding. But to what degree I don't know

Bruce: I would not be surprised that even if the 350 were certainly one of their largest donors

Craig: Bruce definitely were certainly one of the largest and were the largest provider still even though bio script with the United transition... BioScripts now have quite a few patients

Amy: yeah over the last year or so they added in a couple of other providers Coram and BD RN are are now providers so they'll get some of our or provoke referrals

Bruce: okay so where the point where they understand that we are willing to continue and willing to increase our contributions back to 350 and it is clear to them that were not willing to contribute to an organization that is placing us in an unfavorable position with patients?

Amy: uh-huh ...correct

Bruce: in terms of relationships in this organization Craig I know that you have a number.... How do you guys want to pursue cause I... I mean I think this is an opportunity for someone to face-to-face and let me know if that needs to be me but face-to-face to have that discussion that talks like Amy had but to have more of us with touch points in the organization to say we're delighted to find we believe in your mission but that at the same time you have to be true to your commitment that you're not going to place us in an unfavorable position.

Craig: Bruce I think it would be good to you set that up I think bringing Diana into the loop she set up relationship in the past in our broader in the past in a different life but I think that that would be appropriate I think we tried to coordinate you and I coming in there with Frank and with everyone's schedule it was difficult if we can make that happen I think that would be positive as well I think they want to see you and I think they also want to see Frank at some point they still do feel like they're right all along in this situation that it's more of a business transaction they really still don't I don't think they

just don't understand what we have to contend with and with the charitable process and what's appropriate and ethical and legal versus you know what they want and that you know if we have a bigger percentage of patients on their program they expect us to pay those premiums so I still think more of a senior-level relationship would be good going forward and him him the bad guy in there but in their eyes you have had to deliver a tough news so I have thick skin by this time and I'm okay with that and don't need to provide good need news to them someone else to do that as well

Bruce: I'm fine with you doing that I think you and Diana would be a great team to go in together

Craig: okay we can do that

Bruce: if I can make it but like to meet with them and have some face-to-face exposure with them but I don't think you should wait for my calendar. Okay so we've had a conversation with Pete in and I'll follow-up with an e-mail that this is what were going to do sounds like we have a process to pay this on a quarterly basis that's probably the way to go monthlies probably couldn't be more than we can handle more than our systems can handle

Craig: okay sounds good. Are you on board Kirk?

Kirk: yes sounds good.

Bruce: anyone have any other ideas are different ideas that we should discuss?

Amy: I think it sounds like a good plan

Craig: you know the other thing to that I just want to bring up you know Amy brought up yesterday that the bio script folks are struggling with the volume they're receiving from United so this is a group that we should be able to tap into at HS I and J that if patients are complaining we can call Sanjay and ask them to call United and say hey this is what we're hearing from our members in are you sure you want to do this transition and I don't know if they would do that you know to Indo callout bio script but they're there to protect their members and their members aren't getting the service that they require especially nursing support and this is something that we should be able to tap into in regards to calling United so Amy do you want to share a little bit

Amy: I had the opportunity to speak to a former credo employee now with bio script at a Christmas event he was extremely nervous about the volume that was coming through them he was very worried and trying to communicate that message internally at bio script I do think that if members come to Sanjay with concerns they would go to United

Craig: so Bruce and Kirk just so you understand in New Jersey the standards of care that were passed from a legislative standpoint optimum United's pharmacy will not meet those standards so they have to use bio scripts in the state of New Jersey

Bruce: oh I didn't know that

Craig: yeah so that's why bio script is getting 50 or so patients and that's what we've been trying to get other states to to pass Pennsylvania's been trying to do it other chapters been trying to do it so that is those large insurance companies try to vertically integrate and bring in the business that there are standards of care around therapy now there is a loophole in that around self-funded plans self-funded plans do not need to follow but that standards of care legislation but they don't always know that either it is wanted to give you guys that bit of information so you learn more about this community and what's going on out there

Bruce: yes that's helpful thank you

Diana: yes we've heard the bio scripts is suffering in the market from physicians even on the IG business course on the IG side we didn't have a voice like can J to go to United and a lot of our physicians now there were getting the IG back are very excited now that they don't have to use bio script because of their clinical issues so the hemophilia community is very vocal we should deftly keep on top of that and Steve we should make sure that our cams and CRS's know that are on top of that...

Steve: okay

Diana: report back to us with any complaints if they hear is unsure they will continue to hear from patients

Bruce: okay Steve you're okay with this direction

Steve: yes I'm very pleased to hear that Elena is except accepting the 350 there were kind of turning their nose up at it before so this is a pleasant change

Amy: how we want to communicate this to him to make a call and set up a meeting for you Craig or did you make the caller that he would proceed

Craig: the me through some dates out to Diana and I can make a call and set the visit up for us because I think we want the president of HSI to be there Carl I guess what you think

Amy: I think that's good

Bruce: and Craig you may want to request a check from the foundation prior to that meeting so you can say it's on its way

Craig: yeah definitely and I'll work with Pam on that so were agreeing to do quarterly for the whole 350 as I write

Bruce: yes I think orderlies better than monthly

6

Region meeting:

January 24, 2010

Attendees:

Diana Florio, Vice president sales,

Steve Greenfield, Area VP

Amy McBeth, Account manager,

James Cline, Customer Account Manager

Evelyn Tezak, Customer Account Manager

Martha Occhiogrosso, Customer Relations Specialist

Michelle Porter, Customer Relations Specialist

Christine Hayes, Customer Account Manager

Michelle: The only thing that concerns me is that these people are very educated very savvy they notice if we are not sponsoring something..... We hear about it... We heard about it with HANJ and my goodness the letters...

Evelyn: Well, maybe with the change in helm we can cut back... With Elena leaving and stuff.

Jim: Elena is not leaving... Maybe in a year ...Ann Rogers is leaving maybe we can cut back there

Martha: We can cut them (HANJ) ...but then we lose patients and they write those nasty letters...

Diana: This year we'll give a lump sum and then pay quarterly but if they start bad mouthing we'll cut them off... So either play nice in the sandbox... Or we take the money away

Jim: Yeah just don't bad mouth us and were cool

Evelyn: I found out two years ago how much they got and... Wow!

Jim: They pay for 50 different policies...

Martha: They pay for more than that.

Diana: The interesting thing is... The state of New Jersey has legislated that HANJ needs to pay for insurance but there is no funding for that so they actually approved that they should be funded by providers and manufacturers. Any other state in the country that would be illegal... That's inducement.

I'm gonna pay you a contribution and in return you're gonna give me patients, right?... That is against every Stark Amendment and inducement legislation out there. In fact, every time I hear it I twitch because in any other part of our world you'd be thinking you'll be in stripes in no time at all... Only in New Jersey... To Jim's point, as a result of us giving that money we got 58 patients out of something like 63 ... That they support 58 of them are ours... That's why the pressure from them is that we should give our unfair share.

Amy: it also supports the treatment centers so they don't have to sell factor...

Evelyn: So that's why you're always over 100%
